Teofilo Callanaupa

New York, NY | 917 - 674 - 4657 | https://callteo.web.app/ | GitHub | LinkedIn | teofilocallanaupa@gmail.com

TECHNICAL SKILLS

Languages – HTML, CSS, JavaScript, Python, Java
Databases – PostgreSQL, MongoDB
Frameworks – React, Express
Other – Firebase, Heroku, Travis CI, Sequelize, Mongoose, Plaid API, Socket.io, Phaser 3, Microsoft Azure, Git, Github

PROJECTS

ClassPet | *Software developer* (https://devpost.com/software/class-pet)
- ClassPet is a task and token management web app designed to assist teachers, caretakers, and students in a remote learning environment, built in 3 weeks for the "Microsoft Azure US Hack for Accessibility" hackathon.
- Utilized Microsoft Azure AI cognitive services to build a responsive chat bot with speech capabilities.
- Constructed React components with React Hooks and Redux states to manage the current user.
- Built RESTful API endpoints through Express to manage and retrieve user data.

Plutus | *Software developer* (https://phantombudget.herokuapp.com/)
- Plutus is a progressive web app that allows users to create a budget and visualize their spending by connecting a bank account.
- Designed React components and Redux states to maintain and display historical transaction data.
- Utilized MongoDB, Express, and Plaid API to retrieve and update private user financial data.

UFO-Tofu | *Software developer* (https://ufo-tofu.herokuapp.com/)
- UFO-Tofu is an e-commerce web app that allows users to adopt fictitious pets and allows admins to manage inventory.
- Utilized Redux and React components to manage user session data.
- Built RESTful API endpoints through Express to manage and retrieve adoption agency data.

Mahjong | *Sole software developer* (https://github.com/TeofiloCallanaupa/TestMahjong)
- Developed an MVP 2 player tabletop game over the course of a 4 day hackathon.
- Built the UI through Phaser 3 so users can interact with the board.
- Utilized Socket.io to provide real time updates on gameplay choices.

EDUCATION

Fullstack Academy - Web Development Fellowship   February 2021
Intensive 3 month full stack web development bootcamp taught in Node.js, Express, React, and PostgreSQL fully sponsored by the NYC Tech Talent Pipeline.

New York University   Degree in progress
Major: Psychology | Minors: Computer Science, Math (Intro to Computer Science, Data Structures, Calculus 2)

PROFESSIONAL EXPERIENCE

Uniqlo
Advanced Associate   July 2019 - October 2020
- Supervised and managed 8 sales associates on day to day operations on the floor.
- Mentored 50+ sales associates in 4 locations on Uniqlo's core values and operational tasks.
- Onboarded 20+ new hire sales associates on day to day operations and product knowledge.
- Created training documentation for other Advanced Associates on product ownership.

Sales Associate   June 2018 - July 2019
- Led 2 sales associates on special projects assigned by management.
- Trained and led 10+ sales associates on client interactions and inventory management.

NYU America Reads/America Counts
Tutor   September 2014 - June 2016
- Assisted head of Math Department in both group and individual lessons for middle school students in math and science.
